AI ENABLEMENT COACH | AI ENABLEMENT LEAD | TECHNICAL PROGRAM MANAGER | SOLUTIONS ARCHITECT | CTO | DIRECTOR | AGILE PROJECT MANAGER

Technical Leader with 20+ years of experience in strategizing product/program management initiatives by working directly with engineering teams. Certified Agile/Scrum Master, skilled in streamlining project execution through risk management, agile adoption, cross-functional collaboration, and stakeholder engagement. Analyzed data and performance metrics to provide insights and recommendations for improving products, features, and processes.

Top Skills: Technical Leadership, Strategic Planning, Process Improvement, Data Architecture, Business Intelligence

- Designing and implementing next-gen AI solutions that accelerate business growth and technological advancement
- Technical Leader with extensive experience leading cross-functional teams to deliver AI-driven solutions and product innovations for startups.
- Spearheaded complex projects from concept to execution, with a focus on generative AI, cloud architecture, and machine learning technologies.
- Collaborated with engineering and product teams to align business goals with technical solutions, driving product development and performance improvements.
- Adept at translating customer needs into scalable architectures and leveraging strong problem-solving abilities to deliver data-driven outcomes.

WORK EXPERIENCE

Deloitte (Customer Large Healthcare Provider)

AI Enablement Coach/Lead (Contract)

Sep 2025 - Present

- Coached cross-functional sales and delivery teams on AI-powered enablement workflows, helping sellers and consultants adopt GenAI tools for prospecting, account planning, and proposal development
- AI Ideathon / Hackathon: Architected a two stage Ideathon/Hackathon program enabling IT and engineering teams to generate and prototype AI solutions for internal challenges, with clear criteria, judging model, and compliance guardrails aligned to the AI roadmap. Created executive briefings and event structure (hybrid format, 2-3 day sprints, technical environments, and mentor support) that secured leadership sponsorship and produced working prototypes feeding an ongoing AI innovation backlog.
- AI Newsletter: Designed and launched a monthly Elevance Health / Carelon AI newsletter for IT, curating governance updates, internal AI initiatives, and healthcare/AI trends to clarify guardrails and raise AI literacy across business units. Built a repeatable, brand compliant communication channel with leader interviews, associate spotlights, and interactive polls that surfaces real use cases, skill gaps, and adoption challenges to inform AI enablement priorities.
- Designed AI enablement playbooks, battlecards, and micro-learning sessions that increased day-to-day usage of Copilot, OpenAI, and Azure AI tools across consulting teams.
- Partnered with sales leaders and engagement managers to define AI value stories, qualify opportunities, and translate client pain points into GenAI enablement use cases.
- Facilitated hands-on AI coaching sessions and office hours, using live customer scenarios to improve confidence, reduce time-to-value, and capture adoption KPIs.

- Advised on responsible AI, data privacy, and change management considerations to ensure scalable, compliant, and sustainable AI usage across accounts.
- Drove AI tool adoption for PO Assist, QA Assist, GitHub Copilot, DevAssist, and Windsurf across Caelon, MBM, CBH, and other BUs, aligning with the Caelon Integrated Technology Enablement program.
- Partnered with product owners, QA leads, and Engineering Excellence to roll out Jira-based PO Assist and QA Assist, including training sessions, MS Forms feedback, and follow-up enablement meetings for low utilization teams.
- Helped design the AI adoption roadmap, standardizing Jira work item/tag practices and defining participation targets, timelines, and success metrics across business units.

City Colleges of Chicago

Adjunct Professor (Part Time)

Chicago IL

Sep 2025 - Present

- Teach undergraduate courses in Computer Science, AI, focusing on practical applications and industry-relevant skills.
Develop and deliver curriculum aligned with modern IT and cloud technologies, incorporating hands-on labs and real-world case studies.
Mentor students on career pathways in technology, including certifications and emerging trends in AI and cloud computing.
Collaborate with faculty to integrate innovative teaching methods and digital tools into the classroom experience.

CommunityInsight.AI

Founder/Owner (Board)

Jan 2025 - Present

- Product leadership: Defined vision, roadmap, and KPI framework; stood up MVP with secure auth, role-based access, and usage analytics.
- Data & integrations: Designed ingestion/normalization pipeline and implemented MVP integrations for Grants.gov (Search2), SAM Assistance Listings, USAspending, and selected Socrata/CKAN portals to unify federal/state/local grant discovery.
- AI insights & UX: Built LLM-powered plain-language summaries (deadlines, eligibility, award ceilings), smart filters, and watchlists; shipped alerting for new/updated opportunities.
- Go-to-market: Created pitch/lean canvas and Wefunder profile; launched targeted beta recruitment and investor outreach (Apollo sequences, Calendly funnels).
- Delivery excellence: Established CI/CD + feature-flag playbook, added automated E2E smoke tests, and ran human script-based usability testing prior to beta.
- Partnership motion: Initiated pilot discussions with local government and nonprofit stakeholders; prepared grant-readiness briefs and impact reporting templates.

Microsoft

Principal Technical Program Manager

Chicago, IL

Jan 2021 - Dec 2024

- Drive clarity in problem scope and ensure technical alignment on deliverables as a Technical Program Manager within the Industry Solutions Engineering (ISE) group.
- Create reusable assets for vertical industries and cloud solutions, empowering organizations to maximize the benefits of Intelligent Cloud and Edge technologies.
- Chaired technical discussions and planning sessions to discuss essential features, project milestones, and deliverables with Technical Leads and Customer Stakeholders.

- Serve as the OpenAI/Generative AI Champion, training the team on Generative AI and Large Language Models to tackle customer digital transformation challenges.
- Managed integration of Azure AI services, delivering scalable solutions that positioned project as a leader in AI applications.
- Reached key milestones in AI-driven automation and analytics by directing a cross-functional team in the project lifecycle.
- Coordinated business efforts to ensure alignment and secure buy-in for product management and release initiatives, including necessary trade-offs and adjustments.
- Guided cross-functional teams in developing problem statements and hypotheses for product and service features, fulfilling business/customer needs, and identifying interdependencies.
- Pinpointed root problem patterns/trends and leveraged research data to prioritize features based on customer impact.
- Built relationships to support the orchestration and integration of various features in complex cross-functional projects involving product and service teams.
- Offered product improvement recommendations to stakeholders and service owners through data and risk analysis.
- Collaborated with the engineering team to define priorities and execute the roadmap for various feature areas across divisions, clarifying value propositions and addressing technical inquiries.
- Evaluated resource needs and promoted effective allocation to support project goals.

Avanade, Inc.

Chicago, IL

Senior Group Manager

Sep 2007 - Jan 2021

- Led the execution of key IT projects for an international client base, managing teams of 40+ to meet objectives as a client-facing enterprise consultant.
- Directed multiple large-scale mobile projects as the lead architect, creating intricate solutions using Azure PaaS/SaaS services.
- Spearheaded a 25-member Agile CRM project for the Singapore government, overseeing a budget of \$7M.
- Fulfilled project and resource constraints to ensure timely delivery, achieving a completion rate of over 95%.

Senior Solution Architect | Scrum Master

Sep 2009 - Jan 2021

- Collaborated with the sales team to develop pre-sales strategies and design tailored technical solutions for clients.
- Guided the client's transition to an Agile/Scrum framework by assessing current Application Lifecycle Management (ALM) processes, evaluating progress, and identifying necessary steps for migration.
- Led software development teams through significant transformations and project implementations using Agile methodology, as a Scrum Master.
- Ensured project success by identifying and eliminating obstacles, enhancing team productivity, and prioritizing critical tasks.

Agile/Scrum Coach

Sep 2015 - Jan 2021

- Promoted Agile/Scrum practices within development and delivery management communities by leading over 20 training sessions each year, enhancing education and certification for thousands of participants.
- Selected as the North American Agile Coach to assess the viability of more than 350 deals in 2017, ensuring proper Agile alignment and accurate estimation through best practices.

Global Agile Lead

Sep 2013 - Jan 2021

- Drove global growth through the Agile @ Avanade program by executing training strategies and aligning projects with stakeholder objectives.
- Advised clients on large-scale implementations and creating roadmaps for Agile/Scrum maturity.
- Designed an Agile transformation program that trained over 2,200 resources, including 225 Professional Scrum Developers and five certified global Agile Coaches in Brazil and Argentina in 2017.

EDUCATION

Illinois Institute of Technology (in collaboration with Edureka)

Post Graduate Program, Generative AI and Machine Learning

Illinois Institute of Technology | Chicago, IL

Master of Science, Computer Science

Illinois Institute of Technology | Chicago, IL

Bachelor of Science, Computer Science

- **AI Enablement Manifesto** - <https://aienablementmanifesto.com/>

- Created the AI Enablement Manifesto, a practical framework for turning generative AI investments into real, measurable changes in how people work, decide, and serve customers. It responds to a growing pattern: large GenAI budgets and impressive pilots that rarely translate into durable improvements in everyday workflows, customer experiences, or business outcomes. The manifesto is a simple, opinionated guide leaders can use to challenge “AI theater” and refocus on adoption, trust, and value creation.
- The manifesto adapts the Agile Manifesto format to AI, defining value shifts such as people & workflows over models & tools, sustained adoption over one off pilots, and human agency over automation theater. Each value is supported by principles that emphasize starting from real work, reducing cognitive load, designing for experimentation, and aligning incentives and metrics with outcomes rather than raw usage. Together, the values and principles provide a shared language for product leaders, architects, and change agents to evaluate GenAI initiatives and make better trade offs.
- Designed and built the companion AI Enablement Coach, an interactive assistant that generates enablement first roadmaps for AI initiatives. The coach guides teams through stages such as preparation and problem framing, workflow redesign, experimentation plans, feedback loops, governance, and measurement, surfacing questions about ownership, adoption, guardrails, and customer usefulness.
- The manifesto and coach are used by leaders, product teams, and coaches who want to move beyond GenAI pilots that stall to AI capabilities that are adopted and trusted in daily work, helping organizations rethink how AI fits into their operating models.

Project: AI Engagement Accelerator Kit (Open Source)

Designed and launched a framework used by engineering and product teams to plan, test, and deploy GenAI solutions

- Authored guides for agile GenAI delivery, stakeholder engagement, and MLOps pipelines
- Created reusable notebooks, RAG wrappers, and training templates for enterprise AI
- Integrated Streamlit, LangChain, Hugging Face, and OpenAI tooling into hands-on examples

<https://dev.to/stanchat/from-chaos-to-confidence-why-i-built-the-ai-engagement-accelerator-kit-i6n>

Smart Assistant • Wealth Management and Personal & Corporate Banking (WMPC)Jul 2023 – Jul 2024

Developed a multi-purpose GenAI product to assist client advisors in discovering relevant internal documents for client needs.

Phase 1: MVE:

- Successfully demonstrated the feasibility of migrating an internal pilot from GCP to Azure, maintaining performance standards within a complex technical landscape.

Phase 2: MVP:

- Launched a strategic GenAI MVP for UBS WMPC, guiding the client toward a lower-risk scope and future planning.
- Delivered a framework for hypothesis-driven development, integrating Responsible AI principles and addressing technical limitations.

Predictive Modeling & Model Training:

- Designed and trained predictive models to analyze historical client data, enhancing the relevance of recommendations for client advisors.
- Fine-tuned large language models (LLMs) using curated datasets to improve document discovery accuracy and task efficiency, achieving a 15% reduction in task completion time.
- Implemented a robust model training pipeline, enabling continuous optimization and performance tracking.

Chatbot Design & Implementation:

- Led the development of a multi-purpose GenAI chatbot to assist client advisors in discovering relevant

internal documents.

- Created intuitive conversation flows to improve navigation, integrating natural language processing (NLP) for seamless interaction.
- Adhered to Responsible AI principles, ensuring transparency, fairness, and explainability of chatbot responses.
- Achieved a 72% user satisfaction target (CSAT 3.8), with 157 active users and 230 beta testers during Phase 2 MVP.

INDUSTRY EXPERTISE: (SUMMARY)

As a seasoned project manager and technology leader, I have led diverse initiatives across multiple sectors, including retail, healthcare, insurance, manufacturing, energy/utilities, financial, technology/telecommunications, government/public sector, agriculture/food processing, environmental services, food and beverage, and transportation/airlines. My responsibilities typically include developing project plans, managing budgets, and ensuring timely delivery within scope. I coordinate with stakeholders, assess and mitigate risks, and lead cross-functional teams to achieve business objectives. Whether implementing technology solutions, managing agile transformations, or overseeing infrastructure projects, my focus is on strategic planning, effective communication, and team leadership to drive successful outcomes.

INDUSTRY EXPERTISE: (DETAILS)

- **Retail**

- Walmart: Application Lead for a Silverlight application used in over 6,000 retail stores across the U.S. (March 2011 - January 2012).
- Best Buy: Lead Architect for a customer software initiative using Agile/Scrum methodology (October 2010 - October 2011).
- Kohls: Agile Lead enterprise agile transformation (July 2014 - January 2015).

- **Healthcare**

- Ventana Medical Systems: Software Product Technology Architect for updating the SDLC roadmap (March 2015 - July 2015).
- Avanade Internal Project: Developer for a Virtual Healthcare application using Kinect (July 2012 - August 2012).
- Cardinal Health: Application Lead for the SYNTrac project (April 2009 - October 2009).

- **Insurance**

- Axis Insurance: Application Integration Architect for a Dev Ops assessment (October 2015 - November 2015).
- Assurant Health: Data Modeler for a database assessment project (October 2007 - February 2008).
- Aon Insurance: Application Lead and Architect (Oct 2010 - Mar 2011):

- **Manufacturing**

- Caterpillar: Tech Lead for migrating a legacy application to Microsoft Azure (August 2018 - December 2018).
- Miller Coors: Software Product Development Lead for updating a forecasting and planning application (March 2008 - June 2008).
- General Motors: Technical Program Manager for initiative to transform EV process development (March 2023 - June 2023).
- Ecolab: Technical Architect for Azure and Mobile application development (December 2017 - January 2018).

- **Energy / Utilities**

- WE Energies: Application Integration Architect for assessing electrical grid software (November 2015 - January 2016).
- Consumers Energy: Scrum Master for a website redesign project (January 2015 - February 2015).
- CenterPoint: Software Product Development Lead for a SharePoint website refresh (March 2014 - July 2014).
- Chevron: Solutions Architect middleware rewards program (March 2012 - July 2013).
- AUM: Technology Delivery Lead for the URT Dashboard project (March 2013 - February 2014).

- **Financial**

- Scottrade: Scrum Master for a web redesign project (March 2016 - July 2016).
- Chase Bank: Application Lead for an immigration forms project (June 2008 - March 2009).
- Morgan Lewis: Scrum Master for client portfolio projects (February 2016 - March 2016).
- Morgan Stanley: Technical Program Manager for Digital Modernization (February 2022 - May 2022).
- UBS: Technical Program Manager for AI/ML Smart Assistant (February 2023 - May 2024).
- Backbase (Netherlands): Technical Program Manager for large API retail banking Industry Cloud (July 2022 - Oct 2022)

- **Technology/Telecommunications**
 - *Motorola: Tech Lead/Architect for converting mobile applications to Windows (January 2018 - July 2018).*
- **Government/Public Sector**
 - *EDB (Singapore): Enterprise Agile Coach for a Grants Management Transaction Portal cloud Azure migration (January 2018 - November 2018).*
- **Agriculture/Food Processing**
 - *Cargill: Program/Project Manager for the FICT Replacement Initiative (August 2016 - November 2017).*
- **Environmental Services**
 - *Clean Harbors: Business Process Architect for an Agile Assessment (February 2012 - March 2012).*
- **Food and Beverage**
 - *PepsiCo: Application Lead for an Offline Planning Tool (November 2009 - March 2010).*
 - *McDonalds/Ecolab: Worked with Ecolabs as Program Manager on MarketGuard project (December 2017 - May 2018).*
- **Transportation/Airlines**
 - *Delta Airlines: Application Developer for a Windows Phone application for entertainment and dining (June 2012 - July 2012).*
- **Publishing**
 - *RR Donnelley: Partnered with Microsoft Store to deliver automated, large-scale print and in-store marketing solutions, enabling rapid deployment of customized signage across North America and enhancing the retail customer experience through technology-driven process improvements.*
 - *HarperCollins: Supported Microsoft's AI initiatives by facilitating content licensing agreements, providing high-quality nonfiction data for advanced AI model training and development.*
 - *Technical Projects (RR Donnelley): Led successful migrations and redesigns of enterprise Microsoft CRM and Exchange environments, implementing Microsoft-based solutions to improve business continuity and system reliability.*
